

The naviHealth [Patient Navigation solution](#) is purposefully designed to solve for social need gaps, promote physician directed discharge orders and address health disparities. Our non-clinical solution pairs seniors and their caregivers with an experienced Navigator who serves as their health care “quarterback” and advocate when it matters most.

The following is a collection of inspirational “success” stories demonstrating the positive impact and value this program brings as our Navigators prioritize seniors’ needs through individualized support and connection to clinical and community resources.

The logo for naviHealth essential INSIGHTS is displayed on a blue background. "naviHealth" is in white, "essential" is in orange, and "INSIGHTS" is in white. A red line with a dot at the end connects the "i" in "essential" to the "I" in "INSIGHTS".
